CARGO

CARGO'S FRAGRANCES

"Complicating is easy, simplifying is difficult. What cannot be said in a few words cannot be said even in many ". (Bruno Munari)

Cargo arises from a vision that follows three guiding principles in product selection: functionality, aesthetics and reasonable price. The adventure begins in Milan in 1982, with curiosity and desire to discover the unusual daily: from Italy to the United States, from the Far East to Latin America. The conscious choice of the project, then as now, is to look at tradition and know-how, without forgetting innovation and creativity: curiosity, taste and practicality are the elements that unite the different collections of furniture and objects. In addition to knowing how to do things, you need to know how to act: Cargo creates a design for the home environment in the belief that originality and style lie in elegance and simplicity, in the rediscovery and enhancement of craft techniques.

DIFFUSERS

"You are never completely dressed without perfume". And a space is not fully furnished if it does not have a perfumed soul, which tells your way of being. Form and content: emotion is made with the eyes, with an original design for the diffusers. But above all with the nose: scrupulously selected raw materials, pure extracts and craftsmanship, for a natural and quality product, where tradition and creativity meet. 100% made in Italy.

SCENTED BAGS

To bring your favorite fragrances to every corner of the house, respecting your nose and nature. The content of the perfumed bags is in MICA, a mineral of the soil of African origin and Italian processing.
The scented bags can be stored in the drawers: the porosity of the paper guarantees a gradual diffusion of the fragrance over time. They can also be used for home cleaning: by breaking the bag and emptying the contents on the floor, the aroma will be released throughout the room when sucked up by the vacuum cleaner. 100% made in Italy.
