Craftsmanship

Although our objects look pure and simple in form, making them is far from easy. A vast amount of human skills, knowledge of materials, colours and production methods is required to create an object of ideal quality. Iittala glass is of the highest quality and optically very clear. The coloured glassware is coloured all the way through, so the colours never fade or peel off and lose their beauty. All mouth-blown glass items are hand-made and therefore unique. Every Iittala glassblower has his own unique way of working with glass, leaving his own distinctive mark. This unique fingerprint, together with the unpredictability of the glass as a material, creates subtle variations in colour, hue, the thickness of the glass and small air bubbles, giving each mouth-blown glass object its own unique charm.
